

DD DOSING TANKS

Monobloc tank, rotationally molded, made of linear high-density polyethylene, with anti-ultraviolet additives. Food grade, designed for water treatment and dosing systems.

- Cylindrical shape with a flat bottom, and a sloping opening for easy filling and a Ø226 mm screw cap.
- Available in translucent white with volume scale, they allow you to display the fill level.
- Optionally, they can incorporate a retention tray to guarantee watertightness.
- Suitable for temperatures below 40°C and densities up to 1.5 Kg/L.
- Designed to allow the coupling of a dosing pump. Equipped with a wide upper bridge for the placement/fixing of pumps, agitators, etc..
