

POOL COVERS

THERMAL

A SOLUTION FOR EVERY NEED

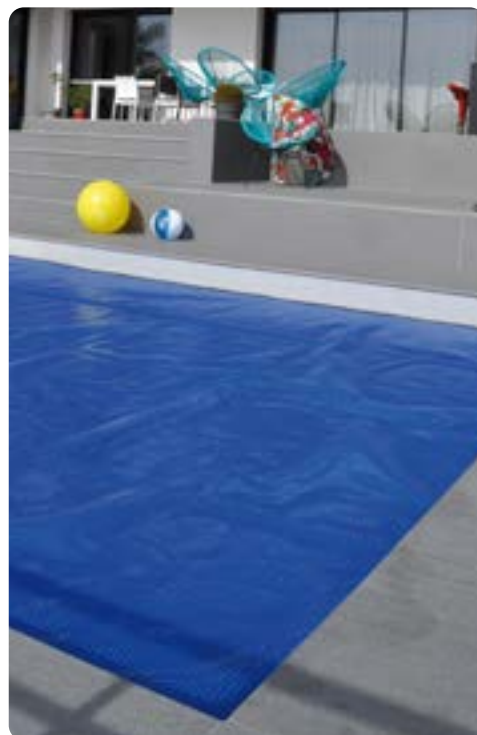

Economical and environmentally friendly. Limits evaporation, keeps water clean, heats and maintains water temperature, reduces water consumption and maintenance products.

Made to measure and adapted to your glass, it floats on the water. It has 2 sides:

- Water side: bubbles that act as thermal insulation.
- Visible side: anti-UV.

CHOOSING THE COLOUR AND THE RIGHT FEATURES

- **Blue:** Basic.
- **Blue Transparent / Translucent:** Maximum solar energy gain. Limits the need for a supplementary water heating system.
- **Black:** Provides good solar performance, prevents algae growth, retains heat and limits evaporation.

Keeps water temperature

Water and maintenance savings

Extend the swimming season

Quick and easy assembly

Facilitates fine-tuning

Protects the swimming pool

Protects against dirt

POOL COVERS

PROTECTION

Keeps the pool water free of dirt when the summer season is over.

ADVANTAGES

- Prevents water decomposition and can be used for the following seasons.
- Minimises the effects of frost.
- Prevents the passage of dirt.
- It eliminates the need for fine-tuning work.
- Preserves the pool shell.
- Offers great resistance to weight.
