

BOX HH

UNDERCOUNTER COOLER

Maximum cooling performance, minimum space under the counter

The BOX HH is a compact water cooler designed for installation under a sink or countertop, ideal for professional environments where cold water is required continuously while taking up minimal space. Its vertical design and small size allow it to be easily integrated into indoor installations, ensuring reliable and quiet operation.

The equipment is supplied semi-assembled, facilitating quick and easy installation, requiring only hydraulic and electrical connections. It incorporates cold water temperature regulation, allowing the service to be adjusted according to user needs.

Manufactured for indoor use, the BOX HH offers easy maintenance and optimal performance. It is a practical and efficient solution for dispensing cold water in offices, hotels, and professional spaces.

SPECIFICATIONS	
Cold water temperature	6-8°C
Refrigeration technology	Compressor
Cold water coil	Outdoor coil
Adjustable thermostat	Yes - 6 to 10°C
Refrigerant gas	R600a
Voltage	220-240 V
Power	125W
Ambient temperature	Up to 38°C
Materials	Metal structure

Compact design for easy installation under the sink

Does not generate noise problems
Impact-absorbing design
