

WELCLEAN CLEANER

COMPATIBLE WITH:

Cartridge filters

Bag filters

Sand filters

WELCLEAN is the perfect ally to keep your pool's filtration systems in optimum condition.

Designed to thoroughly clean, degrease and descale filter cartridges, filter bags and sand filters, it ensures optimum performance and increased durability of filtration equipment.

Its advanced formula efficiently removes accumulated residues such as oil, grease, limescale and other organic and inorganic deposits, ensuring cleaner water and easier maintenance.

With WELCLEAN, keeping your pool spotless has never been easier.

Compatible with:

- Cartridge filters
- Bag filters
- Sand filters

CHARACTERISTICS

- Presentation: White granulated tablets, easy to handle and dissolve.
- Storage: Store in a dry place protected from moisture in a safe place.
- Contents: Contains Maleic Acid, a powerful descaling and cleaning agent.

INSTRUCTIONS

For cartridge and bag filters:

- Prepare a cleaning solution in a container suitable for the size of the cartridge or bag by diluting 1 tablet in 10 litres of water.
- Immerse the filter element completely in the solution and leave it to act for 8 hours to thoroughly descale and degrease.
- After the time has elapsed, rinse the cartridge or bag with clean water to remove any residue.

For sand filters:

- Insert the tablets directly into the sand filter, making sure to follow the specific instructions for use for your equipment.
- Fill the filter with water and leave the solution to act for 8 hours to effectively remove the accumulated dirt.
- Rinse the filter thoroughly before resuming operation.

Important note: We recommend regular maintenance to ensure an efficient filtration system and prolong the life of your pool equipment.
