

PUBLIC SERIES PUMPS

Large capacity self-priming centrifugal pumps. Recommended for volumes from 130 to 420 m³.

- Made of glass fiber reinforced thermoplastic.
- Three-phase motor in accordance with the European standard of efficiency in motors, Ecodesign.
- Turbine in reinforced Noryl.
- 4-pole motor, operation at 1,450 rpm / 50 Hz.
- Large capacity pre-filter (14L) with transparent lid, for easier maintenance.
- Raised base, to ensure good ventilation of the motor.
- Range 5.5 CV to 10 CV.
- Uses: public swimming pools or large volumes, and aquariums that require low vibrations.
- Optional: 60 Hz (consult).
- This pump can be used with salt water.
- 1450 rpm motor - quiet mode
