

FLOW CONTROL FOR UV EQUIPMENT AND SALT CHLORINATORS

The **Switch Control** is the ideal protection for the disinfection system in your pool installation because it will switch off the lamp if the water flow is insufficient.

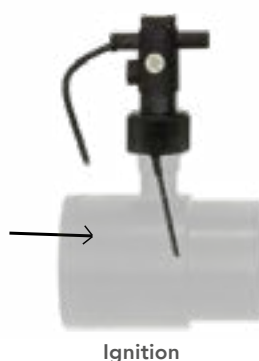

Operation

The **Switch Control** is the ideal protection for electrical devices in the pool installation, for **UV devices and salt chlorinators** or other devices with a rating of up to 10 amps. These devices need to be switched off once the water flow stops, a function that is performed by the Flow Switch Plus.

Thanks to its compact design, the **Switch Control** is very easy to install. Using the special T-shaped fitting, the flow switch can be easily integrated into your new or existing pipes.

Advantages

- Prevents systems from running without flow.
- Easy installation due to compact design.
- Easy to combine.
- Suitable for UV and salt water chlorinator SSC25/45.
